The A Strip sizes are based on twice the width measurement of the ISO A size, by half the depth of the usual measurement. For example, the dimensions for a standard A0 size is 1189 x 841mm. The strip version is 1682mm (2 x 841) x 594 (1189 divided by 2). When expressing the measurements, care should be taken as traditionally the horizontal measure was given first and the upright measurement second.

Strip sizes are ideal to give you an unusual dimension to your printed material. Whether it be a banner, all the way through to clothing labels or stickers.
